JOB DESCRIPTION

Cloud DevOps Engineer

Company: Stratus Works (fictional)
Location: Hyderabad / Hybrid
Experience: 3-6 years

About the role

Stratus Works runs cloud platforms for e-commerce clients. We are hiring a DevOps Engineer to make our releases faster, safer and fully automated, and to keep our infrastructure reliable.

Responsibilities

- Build and maintain CI/CD pipelines using Jenkins, GitHub Actions or GitLab CI.
- Manage cloud infrastructure on AWS (EC2, S3, VPC, IAM, EKS) using Terraform.
- Run containerized applications on Kubernetes and manage Helm charts.
- Automate configuration and patching with Ansible and Bash or Python scripts.
- Set up monitoring and alerting with Prometheus and Grafana, and respond to incidents.
- Improve security, cost and performance of the infrastructure.

Required skills

- Linux administration
- Docker and Kubernetes
- Terraform or another infrastructure as code tool
- AWS or another cloud platform
- CI/CD pipelines
- Bash scripting
- Git

Good to have

- Ansible
- Prometheus, Grafana or the ELK stack
- Nginx
- Python
- Kubernetes certification (CKA)
