Sneha Patil

Machine Learning Engineer

sneha.patil@example.com | +91 90000 00013 | Pune, India | github.com/sneha-example

About

Machine learning engineer with 2+ years of experience building NLP and computer vision models and deploying them as APIs. Strong in Python, statistics and clear experiment tracking.

Skills

Programming: Python, SQL, Bash
Data: pandas, NumPy, feature engineering, data cleaning, statistics
Machine Learning: scikit-learn, TensorFlow, Keras, PyTorch, deep learning, NLP, computer vision, OpenCV
MLOps: MLflow, Docker, FastAPI, Flask, model deployment, Git, Jupyter

Experience

Machine Learning Engineer, Vectora AI Labs

Jul 2024 - Present

- Built a text classification model with PyTorch and Hugging Face transformers that routes support tickets with 91% accuracy.
- Developed feature engineering pipelines in pandas and scikit-learn for a customer churn prediction model.
- Tracked experiments with MLflow and deployed models as FastAPI services in Docker containers.
- Reduced model inference time by 35% using batching and quantization.
- Worked with data engineers to prepare training data from SQL databases.

Machine Learning Intern, DataSpring Analytics

Jan 2024 - Jun 2024

- Trained image classification models with TensorFlow and Keras, using OpenCV for preprocessing.
- Documented experiments and results in Jupyter notebooks for the team.

Projects

- **Fake News Detector:** NLP project using TF-IDF, cosine similarity and logistic regression in scikit-learn.
- **Plant Disease Detection:** Convolutional neural network built with TensorFlow, reaching 94% accuracy on a public dataset.

Education

B.Tech in Computer Science (AI and ML), Example University, Pune (2020 - 2024), CGPA 8.8

Courses

- Deep Learning Specialization (online)
- Machine Learning with Python course
