JOB DESCRIPTION

Product Designer (UI/UX)

Company: Mosaic Apps (fictional)
Location: Remote (India)
Experience: 2-4 years

About the role

Mosaic Apps makes mobile apps for health and fitness. We want a Product Designer who understands users deeply and can take an idea from research all the way to a polished, accessible interface.

Responsibilities

- Plan and run user research, including interviews and usability testing.
- Create user flows, wireframes and interactive prototypes in Figma.
- Design high-fidelity screens for iOS, Android and web.
- Build and maintain a design system with reusable components.
- Make sure designs follow WCAG accessibility guidelines.
- Work with developers to hand off designs and review the final build.
- Use analytics and A/B testing to improve designs over time.

Required skills

- Figma
- Wireframing and prototyping
- User research and usability testing
- Interaction design and responsive design
- Design systems
- Portfolio with case studies

Good to have

- Adobe XD or Sketch
- Photoshop and Illustrator
- Accessibility knowledge
- Basic HTML and CSS
- Design thinking workshops
